

Koneru Lakshmaiah Education Foundation

(Deemed to be University estd. u/s. 3 of the UGC Act, 1956)

Off-Campus: Bachupally-Gandimaisamma Road, Bowrampet, Hyderabad, Telangana - 500 043.

Phone No: 7815926816, www.klh.edu.in

DEPARTMENT OF CSE

PROJECT ABSTRACT SUBMISSION

COURSE: PROJECT EVALUATION (24CS2235F)

A.Y. 2026 - 2027

TITLE OF THE PROJECT		AI-Driven Personalized Healthcare Decision Support and Remote Patient Monitoring Platform	
S. No.	University ID	Name	
1	2420030084	CH Kulashekar	
2	2420030567	Y Hitesh	
3	2420090042	J Dhanush	
4	2420090068	Ch.Bharath varma	
Name of the Guide		Mr. Dwarakanath B	

Abstract

The **Mini Compiler for Educational Programming** is a simple compiler system designed to help students understand the basic concepts and phases of compiler design. The system allows users to write programs using a small, beginner-friendly programming language and processes the source code through different compiler phases. It performs **lexical analysis, syntax analysis, semantic analysis, and intermediate code generation** to identify errors and translate the program into an intermediate representation. The compiler provides clear and understandable error messages, making it easier for students to learn how programming languages are processed internally. The project can be implemented using **Python, Java, or C++** and provides a practical way to understand compiler concepts while developing a functional mini programming language.
